## High-pressure !

The YAKKAir range is a true revolution in inflatable kayaks. The guiding principle of these innovative boats has been the use of multiple materials in the construction to help reduce weight, plus the combination of a keel and a high-pressure inflatable hull/floor to maximise the V effect and performance. The YAKKAir series are lighter, perform better and give a more comfortable ride than conventional inflatable kayaks as you are paddling in the dry thanks to the rigid high-pressure floor. Wind drag/resistance is reduced and they are easier to steer at sea, giving them a performance equal to that of existing rigid designs. YAKKAir kayaks are perfect for your seaside holidays : folded down into a carry bag, they're easy to carry on foot or in the boot of your car and are fully inflated for use in minutes using a high-pressure pump with a pressure gauge. YAKKAir kayaks can be fitted with flexible deck cover to keep splash water out, without any hindrance to movement or safety (see Accessories page).
