

The innovation of an inflatable, the performance of a rigid

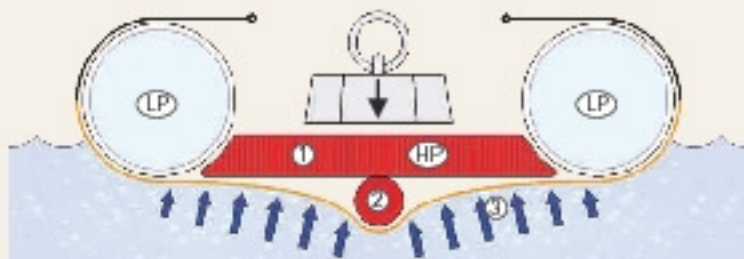

When you sit down in a YAKKAir HP, the high-pressure floor (1) presses down on the high-pressure keel (2) putting the PVC skin (3) under tension. Under the pressure of the water, the skin stretches and curves out to give the hull its high-performance double concave shape.

HP : High pressure
LP : Low pressure

Keel + rigid high-pressure floor
+ fabric + water pressure
= concave shape keel + rigid dry seat

The YAKKAir HP2 has been designed for two person paddling, but can easily be used solo by only mounting one of the seat / stretcher units in the centre of the kayak, where appropriate fittings have been incorporated in the design.

YAKKAIR HP 2

Data specs	Performance	Program
L.: 13'5" / 4.10m w: 37.8" / 0.96m W.: +/- 33lbs / 15kg Maxi load.: 550lbs / 250kg Capacity: 2 adults	Manoeuvrability Straight Line perf. Stability Gliding properties	Sea Lake / flat water Beginner white water Beginner waves
